Tire Carrier&Ladder Combo

Wheel holder with ladder

Tire Carrier & Ladder Combo is a spare wheel holder with an integrated ladder, mounted on the rear doors of a camper. This product frees up interior space, facilitates roof access, and improves vehicle weight distribution.

Made of lightweight and durable aluminum (7.20 kg), it is resistant to damage and weather conditions. Its modern design enhances the campervan's aesthetics, offering both functionality and style in one.

Multifunctionality

Combination of a spare wheel holder and a ladder in one product.

Durability

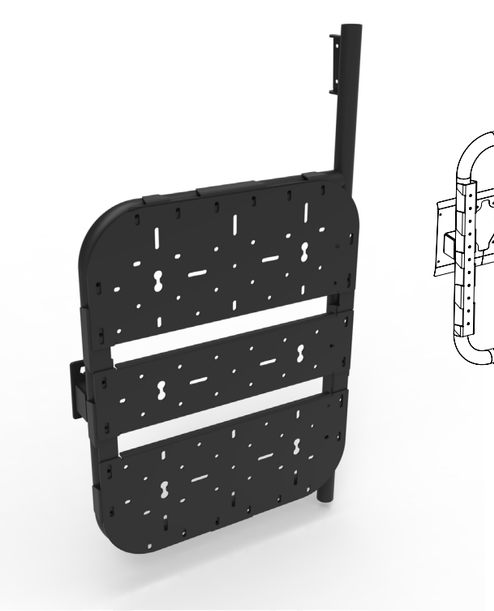

Powder-coated aluminum, resistant to corrosion and weather conditions.

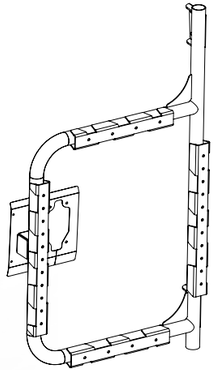

Easy Installation

Simple installation process with minimal vehicle modification.

Dimensions: **174.2 x 61 cm**
Weight: **7.20 kg**
Load Capacity: **1 spare wheel**
Material: **Aluminum**

Accessory Rack

Accessory Rack Passenger Side by Rover Vans is a reliable and functional solution for campervan owners who need extra storage space and external accessory mounting.

Thanks to its solid aluminum construction, the rack allows for the storage of a wide range of equipment, from bicycles and jerry cans to specialized cargo boxes.

Multifunctionality

Versatile mounting options for various travel accessories.

Durability and resistance

High-quality powder-coated aluminum, resistant to corrosion and damage.

Easy installation

Intuitive installation without the need for specialized tools.

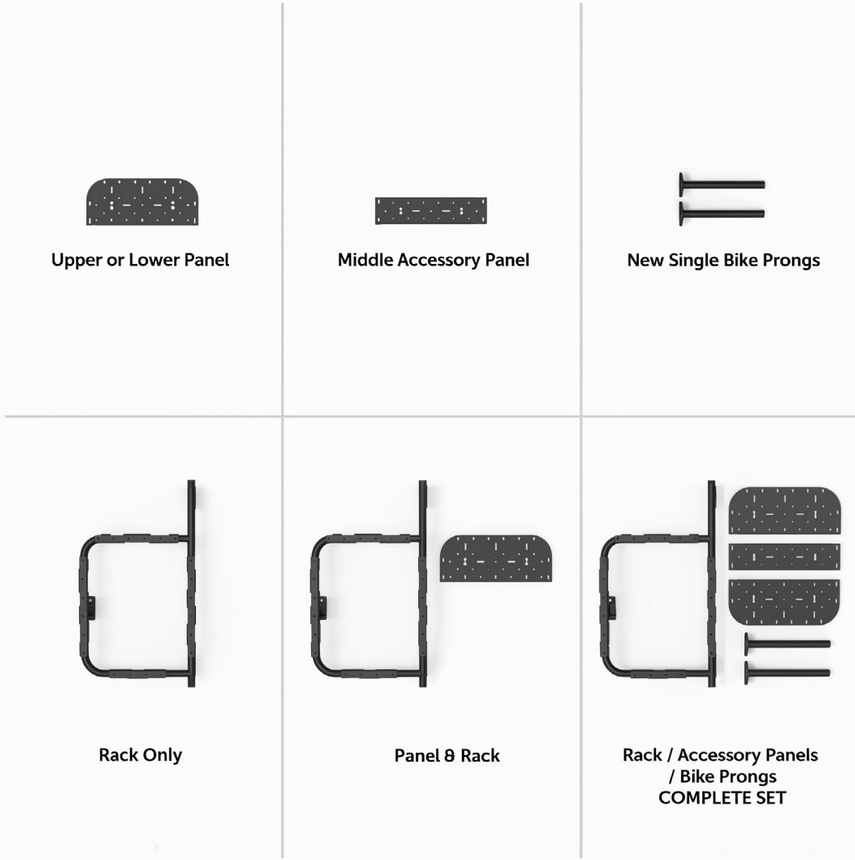

Accessory Rack

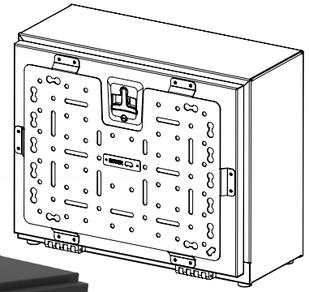

1. **Accessory Rack**
   Dimensions: 1345x755x136 cm
   Weight: 8 kg
   Load Capacity: 80 kg

2. **Upper or Lower Panel**
   Dimensions: 745x 312 cm
   Weight: 4,8 kg
   Load Capacity: 5 kg

3. **Middle Panel**
   Dimensions: 745x180 cm
   Weight: 3,2 kg

Expedition Box

Aluminum box

Versatile Campervan Storage Box

A solid and functional storage box designed for campervans. With a 134-liter capacity and a 40 kg maximum load, it provides ample space for storing tools, camping gear, wet clothes, or gas bottles.

Robust Construction

Corrosion-resistant powder-coated aluminum with seals protecting against water and dust.

Table Function

When opened, the box can serve as a table with a load capacity of up to 20 kg, thanks to durable brake cables.

Adjustable Shelf

The shelf height can be easily adjusted without the use of tools, allowing for optimal space management.

Water Resistance

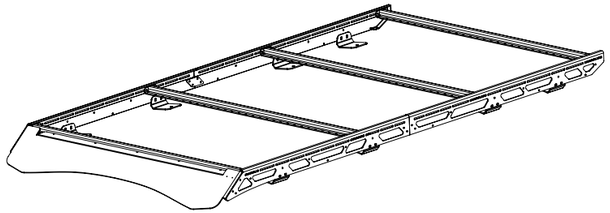

The design provides complete water protection, while built-in drainage holes allow for the safe storage of wet items.

Vibration Resistance

Rubber components absorb vibrations, protecting the contents during travel.

Dimensions: **760 x 610 x 290 mm**
Weight: **16.6 kg**
Capacity: **134 L / 40 kg**
Maximum Load: **40 kg (Shelf: 20 kg, Front Panel: 5 kg)**

Material: **Powder-coated aluminum**
Weight: **33 kg**
Load Capacity: **134 kg**

Roof Racks

Robust and Multifunctional Roof Rack. A precisely designed roof rack, providing a reliable solution for campervan owners. It offers additional storage space for gear and allows for the mounting of solar panels, LED lighting, and other accessories.

Robust Construction

Made from lightweight and durable aluminum, resistant to corrosion and mechanical damage. The powder coating enhances durability against harsh weather conditions.

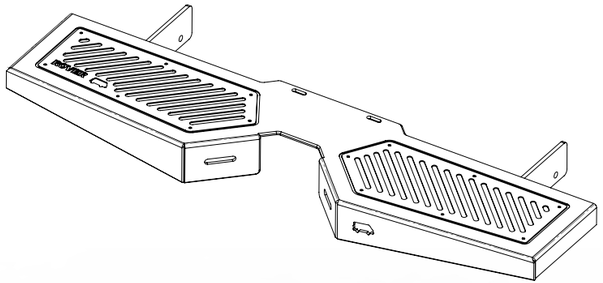

Versatility

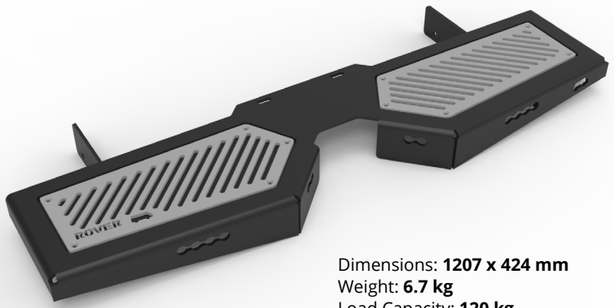

Dedicated spaces for solar panels and easy mounting options for additional elements such as LED lighting, fans, or mosquito nets.

Easy Installation

Installation does not require specialized tools, allowing for quick and easy self-mounting of the roof rack.

Dimensions: **1207 x 424 mm**
Weight: **6.7 kg**
Load Capacity: **120 kg**
Material: **Aluminum**

Rear Step

Aluminum Step

Practical and Durable Aluminum Rear Step. A sturdy rear step designed for campervans, providing comfortable access to the vehicle interior and enhancing user safety.

With its solid aluminum construction, anti-slip surface, and modern design, the Rear Step is perfect for both daily use and demanding off-road adventures.

Anti-Slip Surface

Ensures stable and safe entry, even in rain, snow, or mud.

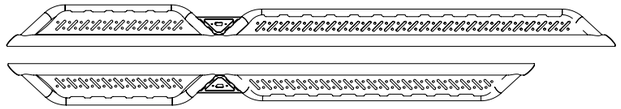

Durability and Lightweight

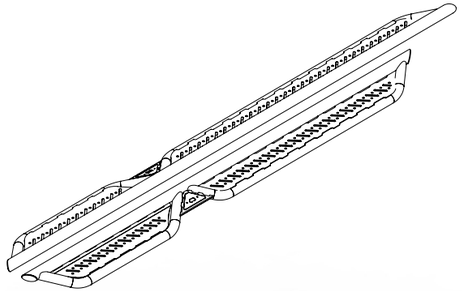

5 mm thick aluminum construction with a 2 mm anti-slip sheet, resistant to corrosion and mechanical damage, while weighing only 6.7 kg.

Easy Installation

Installation does not require specialized tools, allowing for quick and easy self-mounting.

Side Step

Side Step by Rover Vans. Designed for travelers who value comfort and safety.

With its solid aluminum construction, anti-slip surface, and sleek design, this side step is an essential addition to any campervan. It ensures easy access to the vehicle interior, protects the lower part of the van, and adds extra convenience for passengers, pets, and loading gear.

Anti-Slip Surface

Ensures a firm foothold even in challenging weather conditions, such as rain or snow.

Durability and Lightweight

3 mm thick aluminum construction with a tubular profile of Ø50 mm and Ø42 mm. Ensures resistance to corrosion and mechanical damage.

Vehicle Protection

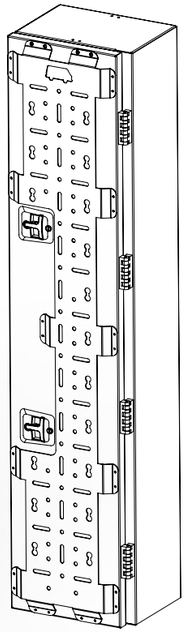

Protects the lower part of the campervan from damage and road debris, preventing sand, mud, and stones from causing wear.

Versatility

Perfect for loading luggage and assisting children, elderly passengers, or pets in entering the vehicle.

Dimensions: **41x200x37 cm**
Material: **Aluminium**

Ski/Snowboard Box L

Aluminum box

Durable Ski & Snowboard Box

The Ski/Snowboard Box is one of the longest ski boxes on the market. Its solid aluminum construction, TIG-welded sides, and powder-coated finish ensure long-lasting durability. Equipped with Italian locks for maximum security and seals to protect against moisture and dust, it is perfectly suited for demanding travel conditions.

Multifunctionality

Compatible with Rover Vans' accessory mounting systems and most other systems.

Capacity

Stores skis up to 200 cm in length, snowboards, and even golf clubs.

Functionality

Movable and removable ski and snowboard mounting system for easier organization. The drainage holes at the bottom allow for water to escape from melting snow or wet boots.

Water Resistance

The seal protects the equipment from moisture and dirt, ensuring secure and dry storage.

Dimensions: **61x200x37 cm**
Material: **Aluminium**

Ski/Snowboard Box XL

Rover Garage System

3-in-1: Bed – Desk – Storage

A multifunctional bed that transforms into a desk and storage space in seconds, thanks to gas strut assistance. It offers 94 cm of clearance for gear storage and a 140 cm wide work surface in desk mode.

The durable powder-coated aluminum frame ensures long-lasting performance and weather resistance, while the finish panels are available in birch, bamboo, or custom options to match any campervan interior.

Three Functions

Transforms seamlessly between a bed, desk, and storage space, maximizing versatility in a campervan setup.

Spacious Design

94 cm of clearance under the bed for bikes and gear. The desk mode offers a 140 cm wide workspace and a storage cabinet for food.

Robust Construction

Powder-coated aluminum, resistant to weather conditions and long-term use.

Compatibility with Systems

Compatible with the Tetravan shower system and a 90-liter water tank.

Rover Garage System

One Piece of Furniture – Multiple Functions

The Rover Garage System is an intelligent piece of furniture that adapts to the user's needs, serving as a bed, desk, and storage space. With the assistance of gas struts, its transformation is quick and easy.

In desk mode, it provides a 140 cm long work surface, perfect for work or daily tasks. When folded, it transforms into a spacious storage compartment with a 94 cm clearance, ideal for storing bikes, sports equipment, or larger luggage.
